1536

Site is a pastoral area involving dark skinned people in a semi-arid setting. Very dependent on a variety of domestic animals. People wear flowing, colorful clothing. Structures present are old, multi-benched, walled, stone, painted in color, adjoining abattoirs, with both open & covered areas. Though they are old they still are in use. An empire seems to have been historically important to the area. Area is very rocky & hilly, possibly of predominantly reddish colors.
